Ms. NaTalia Johnson.

SACRAMENTO, CALIFORNIA — A 37-year-old world-renowned ballerina is dead and experimental COVID-19 shots are again coincidentally part of the equation.

Ms. NaTalia Johnson received one of the experimental shots on April 24, according to her Facebook page. We could not confirm which shot she received. But really at this point, it doesn't matter as all of them are equally lethal.

Ms. Johnson returned home from work at [Leataata Floyd Elementary School](#) at around 9:30 p.m., according to her sister Candida Johnson, aka Kandice Kelly. NaTalia told Kandice that she did not feel good and needed to see a doctor. But NaTalia said she'd rather go in the morning.

The two sisters were watching a movie together when NaTalia said, "I'm really tired." Suddenly NaTalia sat up "with a shocked look on her face" and reached her arms out to her sister. Kandice laid NaTalia on the floor and began CPR when her sister stopped breathing. Paramedics arrived and took over. But it was too late. NaTalia Johnson, known as "Ms. Natalia" to her students, passed away minutes later.

Kandice told the whole story on Youtube.

The aftermath

Kandice said her sister likely died of “a stroke, brain aneurysm or a heart attack.” Coincidentally or otherwise, numerous victims we’ve covered on this website had [strokes](#), [aneurysms](#) and/or [heart attacks](#) after experimental COVID-19 shots. They also all coincidentally died within a few days or a few weeks after the shots. Kandice makes no mention of the “vaccine,” and [neither do media accounts](#).

NaTalia also posted this on May 20, 2020.

[Conservatory of Ballet](#) (NJC). A [GoFundMe page](#) is raising funds to keep the conservatory up and running. Ms. Johnson performed all over the United States and Europe. She performed for Michael Jackson, Prince and two U.S. presidents.

This blog does not know near-enough about ballet to give this woman [the credit she deserves](#) for her career. But obviously she was a VIP in the industry and loved by a lot of people. Memorial services are being held in California, New York and Texas.

20

Coincidences equal genocide

Once is happenstance. Twice is coincidence. Three times is enemy action. There are several variants of this quote. But the Ian Fleming version fits 2021 to perfection. It's bad enough that these experimental shots are killing off the

have zero tangible benefits.

UPDATED May 25, 2021 – S/O to the Waking The Future channel.

They spoke about Ms. Johnson on a recent episode. [Check them out on Bitchute.](#)

There is no joy in writing these stories. In fact this blogger is a bit sad after writing this one. Bottom line is that we can only save those who want to be saved. Humanity has endured over 14 months of coordinated, hardcore brainwashing and psychological manipulation.

Everyone reading this has the responsibility to at least try and spread truth about this surreal, twilight zone world we're living in. Share this website with everyone you know and those you don't know. Stay vigilant and protect your friends and loved ones.

It is indeed incredibly sad; I agree with you.

But I do think there are many people like this lovely dancer who honestly did not know what they were getting in to; and I weep for her and all like her.

After being informed of *both sides of a story*, a person is then, and only then, no longer ignorant. If that person refuses to contemplate the information given to them, they are then stupid. Can't fix stupid.

Even after over 4 months of reports of Cov2 injection fatalities and SAEs, people are still rolling up their sleeve. This was late April. Are they not hearing the reports from Europe at the least about AstraZeneca and J&J? Very sad.

Not sure if you caught it, but we just added 9 new billionaires — all vaccines related. It means more lobby money, more “advocacy” money, etc. Given that this is America, the land of lawyers in which only money talks, the only way out of this is a big law firm with resources to mount a class action suit on behalf of all the injured people. Something like that even MSM couldn't ignore. Sure, the media will circle the wagons and gaslight it, but it will get people researching and digging. The public mood would shift instantly.

Please consider posting a few details about the death of Ashley Taylor Gerren, a 30 year old African American actress who died suddenly, not long after C19 vaccination. The media has hinted it might be due to her having lupus, but lupus patients given standard care typically live a normal lifespan. Lupus is an autoimmune disease with antibodies against RNA and DNA (contrasting with virtually all other autoimmune disorders involving antibodies to proteins). As such, lupus was listed early on as one of a handful of disorders representing a clear C19 vaccination contraindication. Why didn't Ashley's physician know this and warn her? All physicians should know lupus autoimmunity is directed against RNA and DNA, it's very common knowledge, standard med school training. It isn't as though only rheumatologists are aware of this. IMHO, this indication of negligence suggests the public, including most physicians, are in some kind of trance that obliterates critical thinking to the point of being utterly incapable of sensing a grave existential threat.

Hi. We cannot independently verify that Ms. Gerren actually received the shots so we cannot write about it. Same with Tawny Kitaen and DMX. Most people share their shot photos publicly or a family member confirms it. Though all of them likely did succumb to experimental shots, we do not post any stories that we cannot verify that the victim received the shots. The DMX source is not credible in our view. Thank you. -Brian

Thank you for explaining the situation. I went back to find there were some small independent media posts saying some of her friends commented on her Instagram and Facebook pages that she received the 'vaccine'. I assumed she had mentioned it on social media. Apparently not. I understand, odd timing but that's all we have for now. Thanks again, very much appreciate your wise reporting.

This just breaks my heart...she was so beautiful and obviously had much to offer this world. I agree with you dddd; I think she truly did not know what she was getting into. In the video her sister stated she had severe anxiety, which worsened with Covid. Therefore I am guessing that she probably got the shot -at least in part- to ease her anxiety. How truly tragic. RIP NaTalia.

In order for the Pharma and CDC ghouls to say it's a "coincidence " because there's a similar rate of such deaths in the general population, they need to instead look at the rate of such deaths in any two-week period. And also drill down into the rate for similar-age people with similar health statuses pre-injection. Bet they would certainly find such deaths are far more common in the two weeks post-vaxx. So of course they won't be looking.

This is really sad, she lives in my city and my child has gone to that school for summer school. Not fair!

+ 2 — ➔ Reply

**Janyuary** 10 days ago| ➔ Reply to [BeGe](#)

Not right, yes. But not fair? Life isn't fair, no one ever said it would be, God is not fair, but He is just! More important, He is merciful, the opposite of fair. A person expecting fairness must stick to sports, courts, and contests, I'm afraid. Your child is safe and well, that is a thousand times better than fair, I know you will take good care of that lucky one!

I was trying to find a place on your site to contact you, just did a deep dive on the VAERS database querying on the "Symptom" of DEATH for the COVID shot. Horrific numbers and they say only 1% even get reported. There are a total of 3,259 DEATHS as of 5/21. If this is only 1% we could be closer to 325,000. Even if 10% get reported it is 32,000 deaths!! I have it broken out by age group, shot taken, and whether they were on other medications at time of shot.

It's awful. What's striking to me every time are the number of deaths in the first 48 hours after the jabs. Unbelievable that this mass killing has not been stopped by now. Instead, they are having lotteries to "support" people in taking them.

jan 7 days ago

Can you put a counter on the site so that we can see the deaths each month & total which may show the acceleration of deaths (or censorship of the social media sites).
