

# THOUSANDS OF FLIGHTS CANCELLED AS VACCINATED PILOTS FALL ILL OR DIE

👤 Herald Staff 📅 June 21, 2021 ⌚ 7:51 am 💬 17 Comments  
# [AIRLINES](#), [COVID-19](#), [VACCINE](#)

According to a [2014 study published in the Journal of Thrombosis and Haemostasis](#), pilots suffer an increased risk of clotting issues due to frequent and prolonged air travel. Pilots are encouraged to be aware of the signs of deep venous thrombosis and clotting issues and take preventative measures such as compression stockings and stretching of their legs during long flights.

[Medical News Today](#) published a study on June 15th, 2021 that showed an increased risk of blood clotting and low platelets in AstraZeneca COVID-19 vaccine recipients. Some scientists hypothesize that since the ethylenediaminetetraacetic acid (EDTA) in the shot causes a full body reaction, once the vaccine comes into contact with platelets inside the human body, the vaccine [activates those platelets](#), causing them to change shape and transmit chemical signals to the immune system. Those platelets send out [platelet factor 4 \(PF4\)](#), which regulates blood clotting.

However, in some people, after some undetermined amount of time, at random, PF4 latches onto the vaccine, and large “complexes” form. Since those complexes are “unknown,” the human body interprets those clusters as threats. Thus, [immune cells](#) in the body mistakenly attack PF4’s, prohibiting them from preventing the problematic clots seen in some COVID-19 vaccine recipients.

Pilots have an increased risk of blood clots. COVID-19 vaccine recipients have an increased risk of blood clots. [Reuter's](#) and Fact Checkers cannot hide the fact that an increased risk on top of an increased risk is potentially a disaster, but neither has any regard for human life or the truth, as evidenced by the propaganda they’re currently creating by the minute.

Delta Airlines now [requires the COVID-19 vaccine](#) for all new employees, potentially putting Delta employees at risk of blood clots and death. American Airlines doesn’t require the vaccine but gives its employees [one day off of work and \\$50](#) for getting the vaccine. No mention of the inherent risk for non air employees, let alone those who spend ample time in the clouds, is ever made by Delta or American.

## Hundreds of American Flights Cancelled Due to Reported Pilot Shortage

American Airlines canceled over a hundred flights on Saturday and canceled hundreds of others in advance after a shortage of crew left the airline unable to operate some of its summer route network.

Originally reported by [View From the Wing](#).

At British Airways, at least four pilots have died this week, but the airline wants you to know that their deaths are totally unrelated; [Reuter's and Fact Checkers](#) are working hard to dispel any rumors that the pilots could have died from the COVID-19 vaccine. British Airways boasts that [85% of its employees are vaccinated](#). Airlines are so quick to obey the COVID-19 vaccine narrative that they forget the welfare of their own employees is at stake.

According to [flightaware.com](#), 120,000 cancellations per year is the average for global flights. An average day would see 329 cancellations. A 2 day average would see 658 cancellations. But between Friday and Saturday, 3,533 cancellations occurred. **That's a 580% increase in cancellations globally in the past 2 days.**

Southwest delayed or [cancelled hundreds of flights last week](#) and blamed a host of issues such as technical difficulties and weather on the cancellations and delays. American Airlines announced Sunday that it would [cancel hundreds of flights through mid-July](#). American blames weather issues and labor shortages on its preemptively cancelled flights. British Airways, which has seen at least 4 pilots die recently, [cancelled hundreds of flights](#) but then furloughed thousands of its employees with [85% pay](#) this week.

Not to worry; the same agencies (mainstream media, Reuters, and Fact Checkers) tasked with exploring the safety and efficacy of a vaccine for the general public and for pilots who transport [6 million people per day](#) also ruled out a Wuhan lab leak and any conceivable voter fraud in the 2020 elections. Those agencies have [reversed their stance](#) on one of those issues, the Wuhan lab leak, only after it became impossible not to do so. One day, it's conceivable that the media may reverse its stance on the COVID-19 vaccine...when it becomes impossible not to do so...

***Pilots are already at increased risk of blood clots; categorizing them as high risk for a vaccine with a known side effect of blood clots isn't misinformation. It's science.***

For now, pilots should exercise their right to medical freedom and refuse to become vaccinated. Clearly, the truth isn't coming anytime soon.
